	#+ STARTIP: overview	

1 Interface Tweaks

```
(setq inhibit-startup-message t)
(defalias 'list-buffers 'ibuffer) ; make ibuffer default
(tool-bar-mode -1)
(fset 'yes-or-no-p 'y-or-n-p)
(global-set-key (kbd "<f5>") 'revert-buffer)
```

2 try

```
(use-package try
  :ensure t)
```

3 which Key

Brings up some help

```
(use-package which-key
  :ensure t
  :config)
```

```
(which-key-mode))
```

4 Org mode

Org Bullets That makes things look pretty

```
(use-package org-bullets
  :ensure t
  :config
  (add-hook 'org-mode-hook (lambda () (org-bullets-mode 1))))
```

5 Ace windows for easy switching

```
(use-package ace-window
  :ensure t
  :init
  (progn
    (global-set-key [remap other-window] 'ace-window)
    (custom-set-faces
     '(aw-leading-char-face
      ((t (:inherit ace-jump-face-foreground :height 3.0)))))
  ))
```

6 Swiper / Ivy / Counsel

Swiper gives us a really efficient incremental search with regular expressions and Ivy / Counsel replace a lot of ido or helms completion functionality

```
(use-package counsel
  :ensure t
  )

(use-package swiper
  :ensure t
  :config
  (progn
    (ivy-mode 1)
    (setq ivy-use-virtual-buffers t)
    (global-set-key "\C-s" 'swiper)
```

```

(global-set-key (kbd "C-c C-r") 'ivy-resume)
(global-set-key (kbd "<f6>") 'ivy-resume)
(global-set-key (kbd "M-x") 'counsel-M-x)
(global-set-key (kbd "C-x C-f") 'counsel-find-file)
(global-set-key (kbd "<f1> f") 'counsel-describe-function)
(global-set-key (kbd "<f1> v") 'counsel-describe-variable)
(global-set-key (kbd "<f1> l") 'counsel-load-library)
(global-set-key (kbd "<f2> i") 'counsel-info-lookup-symbol)
(global-set-key (kbd "<f2> u") 'counsel-unicode-char)
(global-set-key (kbd "C-c g") 'counsel-git)
(global-set-key (kbd "C-c j") 'counsel-git-grep)
(global-set-key (kbd "C-c k") 'counsel-ag)
(global-set-key (kbd "C-x l") 'counsel-locate)
(global-set-key (kbd "C-S-o") 'counsel-rhythmbox)
(define-key read-expression-map (kbd "C-r") 'counsel-expression-history)
))

```

7 Avy

Navigate by searching for a letter on the screen and jumping to it

```

(use-package avy
  :ensure t
  :bind ("M-s" . avy-goto-char))

```

8 Autocomplete

```

(use-package auto-complete
  :ensure t
  :init
  (progn
    (ac-config-default)
    (global-auto-complete-mode t)
  ))

```

9 Themes

```

(use-package zenburn-theme
  :ensure t

```

```
:config (load-theme 'zenburn t))  
  
(set-frame-font "Source Code Pro 12" nil t)
```
